

Streamlined Core Facility Management

Agilent CrossLab iLab Operations Software

Put easy-to-use, online core facility management tools at your fingertips with iLab Operations Software.

Frustrated with inefficient processes for managing your shared resources? Now you can establish a shared platform that helps your institution realize the full benefits of its core operations investment. iLab Operations Software—part of the Agilent CrossLab family—is an enterprise web-based management software designed to support operations for centralized labs and shared research resources.

The intuitive iLab software interface gives users a consolidated view of their recent activity—as well as the ability to search across equipment, services, and cores.

The research management tools built into iLab Operations Software enable your organization to:

- Streamline reporting and increase transparency for equipment use, budgeting, and forecasting
- Increase compliance and create auditable logs of quote approvals, services delivered, and invoicing
- Shorten billing cycles and increase recharge capture
- Raise awareness of available resources

In addition, iLab Operations Software offers advanced modules to support specific scientific workflows—such as sample submission, stock rooms, patient studies, equipment lock-out, and more.

Now core personnel, administrators, and researchers can save both time and money

iLab Operations Software lets you create a custom management solution with specialized modules and integration options.

Resource scheduling Service request management Project management Base suite Customer management Billing and invoicing Reporting Vendor catalogs Credit card processing Integrations API (e.g., LIMS, data analysis) Identity management integration Financial system integration Instrument access control and usage tracking Study management Storeroom management Additional Inventory production and resale modules Animal management Sample management Inventory tracking Publication tracker **Custom management solution**

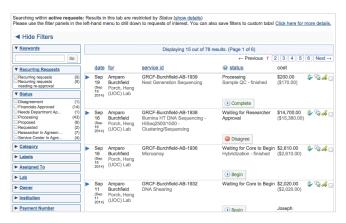

Who needs iLab? You do, especially if you...

- Manage shared equipment or resources
- Provide services based on a specific technology or expertise
- Want to manage costs by tracking work against specific projects
- Centrally purchase consumables
- Need to track individual or group use/ costs of shared resources
- Want to run dynamic reports based on information captured in a fully synchronized system

Manage experiments and projects beyond spreadsheets

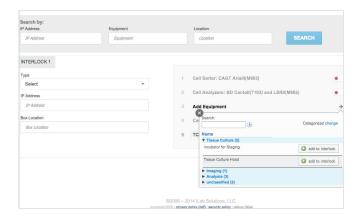

iLab is a modular, web-based software tool that lets you spend more time on science and includes the following capabilities:

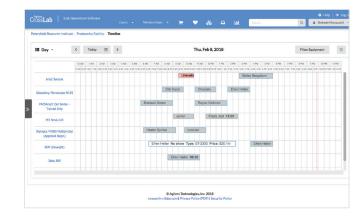

Service Request Management

- Create custom forms to gather vital project information
- Opt to require financial approval before starting work
- Track milestones, services, and hours spent
- Quickly invoice completed work

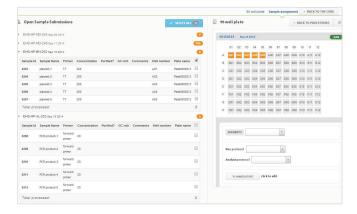

Instrument Use Management

- Securely control equipment access
- Prevent unauthorized users from turning on equipment
- Track scheduled and actual use

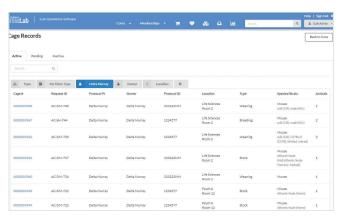

Resource Scheduling

- Create and manage reservations
- Control time-of-day and activity-based pricing
- Restrict access for untrained researchers
- Track scheduled and actual use

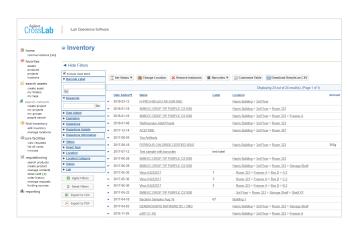

Sample Management

- Define a container type and sample format
- Download custom formatted files for sample processing
- Automatically bill for services

Animal Management

- Place animal orders and create cages
- Simplify census taking with cage card bar coding
- Automate billing and facilitate reporting

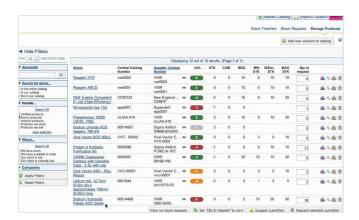

Inventory Tracking

- Track samples, products, and aliquots
- Search/filter for samples along multiple dimensions
- Bar code samples and quickly retrieve metadata

Study Management

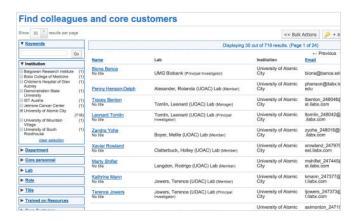

- Associate protocols with intended long-term projects
- Capture critical information about the work to be conducted
- Track and bill per scan or timed use

Storeroom Management

- Take physical or scanned inventories
- Sell products through order entry or point-of-sale
- Allow online and in-person ordering, pickup, and delivery
- Generate vendor POs and revenue/use reports

4

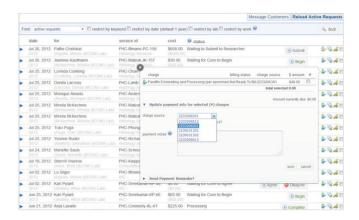

Customer Management

- Find customers and customer information using advanced filtering
- View customer use and manage facility access
- Communicate important facility changes

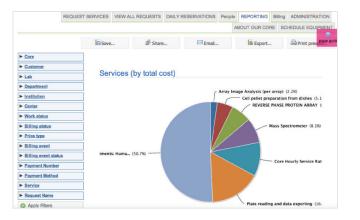

Billing and Invoicing

- Automatically generate and send invoices
- Opt to require invoice approval
- Search for invoices based on customer, institution, grant code, and charge type
- Designate multiple payment sources for invoice charges

Financial Integration

- Validate funds available to core facilities
- Provide researchers with drop-down lists of valid accounts
- Allow managers to set budgets

Business Intelligence

- Design, save, and export custom reports
- Filter data based on quantity, cost, and more
- Compare actual vs. scheduled use
- Compile metrics into easy-to-read charts
- Export full data for additional analysis

More than 170 institutions manage their core facilities with iLab Operations Software

Agilent CrossLab Services: Maximize uptime with end-to-end support

From Insight to Outcome

CrossLab is an Agilent capability that integrates services, consumables and lab-wide resource management to help laboratories improve efficiency, optimize operations, increase instrument uptime, develop user skill and more.

Agilent CrossLab supports Agilent and select non-Agilent instruments and provides consultative support for workflow enablement, lab analytics, compliance, inventory management and asset management, including relocation services.

Learn more about Agilent CrossLab, and see examples of insight that leads to great outcomes, at www.agilent.com/crosslab
