

Improve Operational Effectiveness for Routine Food Testing

Elevate your quality. Elevate your business. Elevate your lab.

It's easier than ever for food testing laboratories to run samples and produce meaningful results. Simplify the way you collect, process, manage, and report chromatography test results with our suite of Empower™ software solutions - from our flagship Chromatography Data System (CDS) to the latest Lab Management System (LMS).

1 CONTROL AND ACQUIRE DATA ON A VARIETY OF INSTRUMENTS

Control Waters ACQUITY UPLC and Arc HPLC systems, as well as non-Waters HPLC, GC, CE and IC systems.

1

3 MORE PRECISE PEAK INTEGRATION

Save time, reduce manual integration, and calculate more precise peak integrations with a powerful integration algorithm.

3

5 APPLY ADVANCED DETECTION TECHNIQUES

Utilize advanced detection techniques such as MS and PDA without the need for third party software.

5

2 TURN DATA INTO RESULTS

Reduce the need for external spreadsheets or manual calculations and reduce transcription errors with embedded or custom calculations.

2

4 REDUCED TRAINING NEEDS WITH AN INTUITIVE INTERFACE

A streamlined user interface provides a single window for instrument control, data collection, data processing and reporting.

4

6 IMPROVED DATA STORAGE AND MANAGEMENT

Store and retrieve chromatography data using an embedded, relational database; simplifying data retrieval by searching using criteria that is meaningful.

6

GLOBAL REACH, DEPENDABILITY, CONFIDENCE

Empower is the universal language of the lab and can be found in the farthest reaches of the globe. Our customers have global data center hubs located in the heart of regions that are most vital to their business.

✓ Supporting 10 Languages

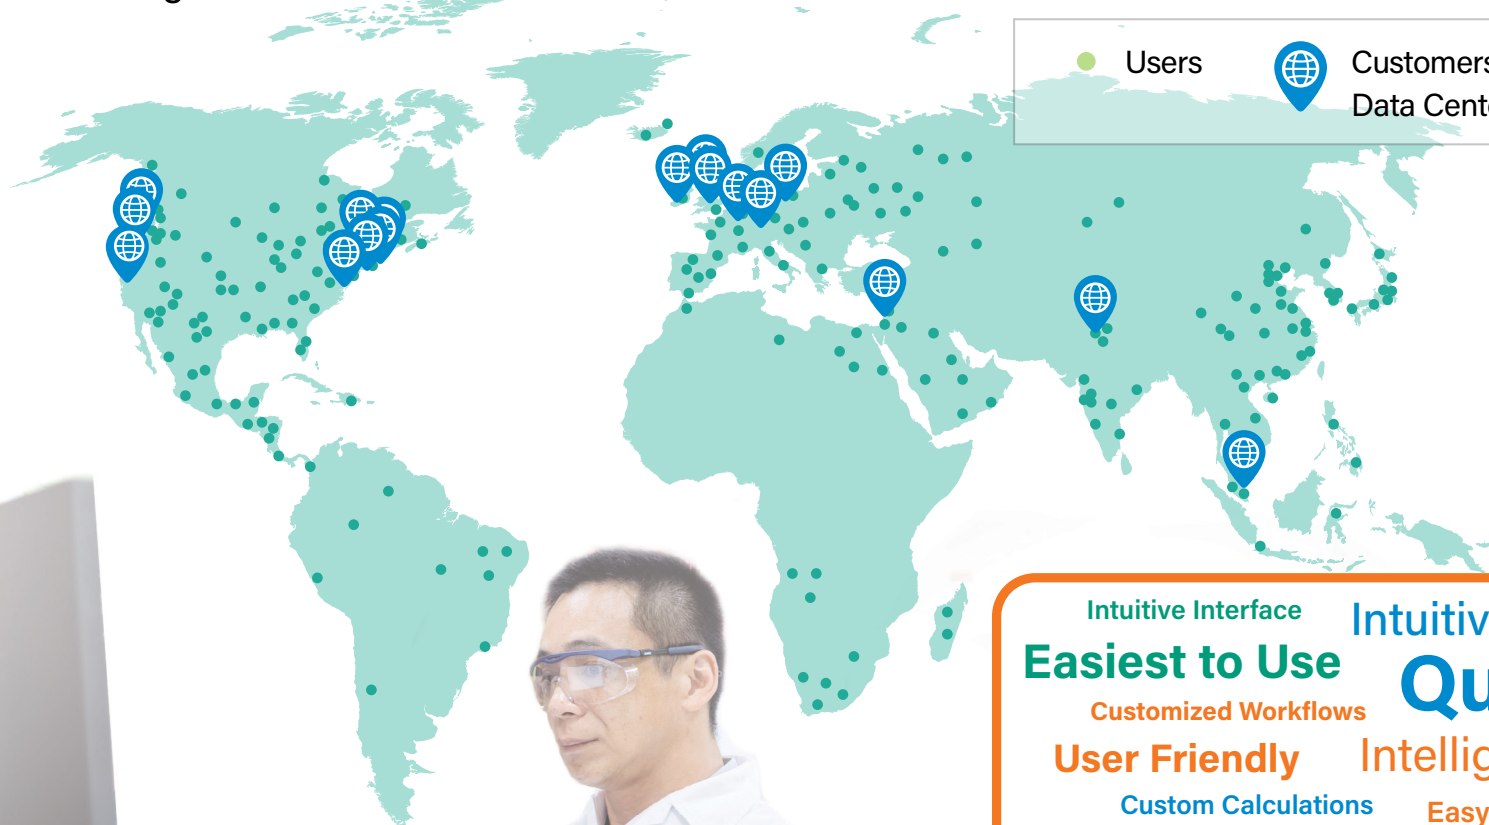

✓ More than 500,000 users

✓ Over 70 countries

✓ Installed on over 5,000 networks
