Everyone knows that Thermo Scientific™ Chromeleon™ 7 Chromatography Data System (CDS) is easy-to-use and brings lab-friendly compliance. Now Chromeleon 7.3 CDS takes this to the next level while also delivering an IT-ready, scalable enterprise solution that is optimized for global deployment. Built-in data security and stability tools ensure business continuity for fastest return on investment (ROI).

Built for the Lab.

> Your lab wants to choose the best tool for the job while your IT department wants to standardize

> Your lab wants the latest innovations while your IT department wants system stability

Compromise has long been a way of life between IT and the lab but that is now a thing of the past.

End the challenge of meeting both compliance and lab productivity needs with a CDS solution designed for both efficiency and data integrity. Delivering ease of use and streamlined workflows that use fewer mouse clicks for more 'right first time' results, Chromeleon 7.3 CDS will make you the envy of your compliance-challenged peers.

Built for IT.

> Your IT department has a 'cloud first' policy while your lab has a 'compliance above all' approach

> Your IT department needs to regularly maintain systems while your lab wants no changes or down time

Chromeleon 7.3 CDS is built for the lab and built for IT. Why compromise?

Chromeleon 7.3 CDS is built to satisfy modern enterprise needs for scalability, stability and data security. As a full enterprise solution, it's designed to scale globally with centralized management while providing strong, reliable ROI. It's the bottom-line decision your lab will love you for.

Proven productivity gains*

- Up to 33% faster
- Up to 33% fewer windows
- Up to 33% fewer clicks

*Based in direct head-to-head workflow analysis with competitive software and Chromeleon 7.2.10 CDS

Increased lab efficiency

- Smart tools for ease of use
- eWorkflow™ procedures for fast, error-free sequence creation
- Industry-leading instrument control for LC, GC, IC & MS

Reduced audit risk

- Comprehensive audit trails
- Easy audit trail review
- Advanced user management
- Documentation and services to support validation

Lower operating costs

- Automated, centralized rollout and updates
- Centrally controlled devolved administration
- Seamlessly scalable from workstation to global enterprise
- Easy deployment with professional services support

Ensured business continuity

- Zero data loss and true 24/7 uptime with industry leading Network Failure Protection
- Central relational database ensures data security
- WAN optimized system for highest stability
